Seeking a Software Developer position

EXPERIENCE

XI Media, Orlando, FL. REMOTE — *Full Stack Developer*

Jun. 2020 - PRESENT

- Work on a team with an agile workflow.
- Develop new and work on existing websites
- Perform back end maintenance on our network
- Communicate with team and management and explain difficult concepts in easy-to-understand terminology.
- Utilize react.js, flask, django, bootstrap, and HTML5

Civic Center / Ice Rink , Columbus, GA — *Security Guard*

Dec. 2019 - PRESENT

- Adhered to strict policies and maintained open and clear communication with lieutenants during events
- Maintained attention to detail in a potentially stressful environment to ensure the safety of all patrons

Circle K, Hamilton, GA— *Shift Supervisor*

Dec. 2018 - Nov. 2019

- Ensured store was properly cleaned and stocked during every shift, leading to a promotion to shift supervisor
- Worked closely with employees to maintain a high standard of productivity and customer satisfaction

PROJECTS

TETRIS— *C# Windows Form*

Making this project was so much harder than expected for several reasons. The collision was basic, until you realize that you can rotate pieces into other, already set, pieces. Writing the collision algorithm was quite a task but I am very happy with the result.

Particle-Kaboom! -- *C++ SDL2*

Using the SDL library, I created and altered a screen buffer. Using math and different algorithms to make pixels EXPLODE from the center of the screen. This was quite a tough project and took some time to create.

SKILLS

- C/C++
- C#
- Python
- Java
- JavaScript
- SQL
- HTML/CSS
- GO

LANGUAGES

1. English

2. Spanish, not fluent... yet

All my projects are listed here at my GitHub:
